

# How to power up your

# Blitz Drone

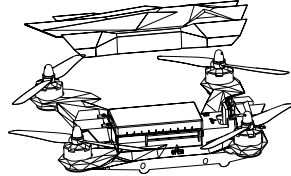

## IMPORTANT INFORMATION - PLEASE READ BEFORE USE

1

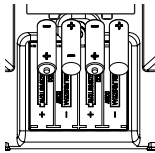

Insert the fully charged Blitz battery into the Blitz drone.

2

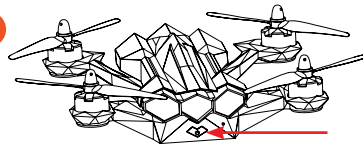

Clip the protective top shell on to the Blitz drone.

3

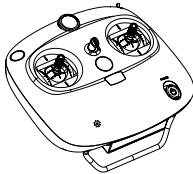

Insert 4 AA batteries into the Blitz controller ensuring that the controller is powered off.

4

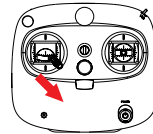

Quickly press the power button on the Blitz twice and hold the second press for 3 seconds to power up the Blitz.

5

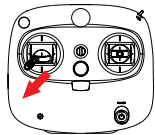

Place the Blitz drone in a safe area to fly and switch the controller's power switch to the (up) on position.

6

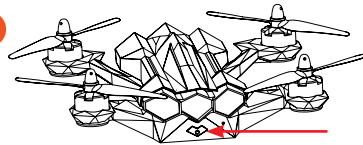

Hold the controller's left thumb stick in the bottom right position for three seconds to arm the Blitz motors.

7

Once you have finished flying your Blitz, disarm the motors by holding the Left thumb stick in the bottom left position for three seconds.

8

Once the motors are disarmed, power off your Blitz by holding the power button for three seconds.

AA batteries and Micro SD card not included. It is recommended that a class 6 and above Micro SD card with a capacity up to 32GB is used. Do not fly your Blitz drone indoors and be mindful of your local drone laws.
